Digital Arts Box Make CREATE

Empower Your School Through Creativity & Innovation

Bring creativity and technology into your classroom with engaging, hands-on workshops designed to enrich learning and inspire students. These sessions support your curriculum goals, develop key skills, and give students unique opportunities to explore digital creativity in a fun and meaningful way.

Meet OFSTED Requirements

Boost Numeracy, Literacy and STEM

Integrate Tech into Your Classroom

We also offer bespoke workshops, ensuring you get the most out of your booking with a session designed specifically for your school's needs.

What's in It for Your School?

Linking to the National Curriculum & OFSTED Standards

Our sessions align with national curriculum goals, embedding creative and digital skills across subjects to support OFSTED's focus on a broad and balanced curriculum.

Developing English, Numeracy & STEM Skills

From storytelling through digital art to coding games with problem-solving elements, our workshops strengthen key academic skills in an engaging and interactive way.

SEND-Friendly and Tailored Support

We provide inclusive workshops designed to meet the needs of students with SEND, offering accessible, adaptable activities that encourage self-expression, confidence, and creativity.

Tailored Workshops for KS1, KS2, KS3 & KS4

Our workshops are designed to be age-appropriate and fully customisable to fit the needs of different year groups, ensuring relevance and engagement at every stage of learning.

Exploring Societal Topics Through Creativity

We use creative projects to engage students in important conversations about topics like mental health, online safety, sustainability, and inclusivity—helping them develop awareness and critical thinking

Dont Just Take Our Word For It:

> Our students have really enjoyed the creative input with the team from Digital Arts Box. Students learned about the motivations and risks for illegal money lending and sources of support before producing their own AI awareness-raising design. Students had to draw a design by hand and then convert this to a professional-looking product using sophisticated software. I am really grateful to all the colleagues and organisations who made this innovative and important interaction possible.

Liam Hussey, Leader of Digital Safeguarding at Ormiston Bolingbroke Academy

> Digital Arts Box provided a supportive and adaptive environment, ensuring that every attendee feels included and empowered. Through engaging activities like video production, photography, and digital content creation, students not only learn technical skills but also enhance their communication, collaboration, and problem-solving abilities. The staff's dedication to tailoring the program to meet diverse needs has been key to the session's success.

Jane Lunt, Ashley High School

Digital Arts Box | Make CREATE

Contents:
